

The Best Choice of Accessories for Maximum Hygiene

Accessories Product range

The MEIKO solution for optimum allround-hygiene

Our motto „MEIKO – The clean solution“ encompasses more than just our portfolio of professional cleaning and disinfection appliances – it also includes the comprehensive range of MEIKO accessories. We believe in delivering optimum hygiene across the board, including surface and countertop materials in a selection of colours, machine accessories such as rack, holder and communication systems, plus a range of cupboards and shelf units.

Creating versatile and hygienic utility rooms

From single machines to fully-fitted utility rooms. Flexible, custom-made solutions including work surfaces, sinks, cupboards, shelf units and much more. MEIKO provides everything you need to make work easier and safer. High-quality stainless steel ensures optimum hygiene.

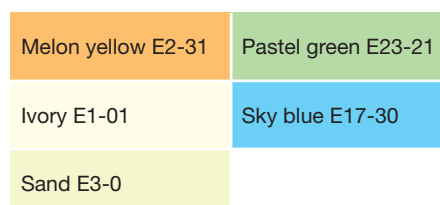

Easy to clean and available in a range of colours: High pressure laminate and CORIAN* panels

If you are looking for something special, we recommend high pressure laminates (HPLs). Manufactured from layers of paper impregnated with thermosetting resins, HPLs are both functional and attractive. Also available on request in other colours and designs at an additional cost.

A harmonious use of colour has been shown to have a positive effect on people's working environments. That's why we also offer our combined sluice units in a selection of colours on request.

Colour sample HPL

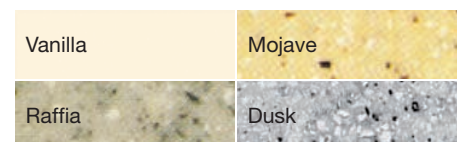

Please contact us for full list of colours

CORIAN is a solid surface countertop material made from a blend of natural minerals and acrylic. Our combined sluice units can also be supplied in a colour of your choice. Wall and floor-mounted cupboard units can also be supplied in all RAL colours, spray painted in matte or glossy finish.

Colour sample CORIAN

* Printing limitations mean that these images do not generally provide a reliable depiction of the actual colour in each case.

MEIKO machine accessories:
the right choice every time

The right choice every time: MEIKO machine accessories ensure you are prepared for every eventuality. From universal all-purpose racks to custom racks for special care utensils, we can help you find the right solution whatever your needs. Designed with users in mind, MEIKO accessories are practical and easy to use, providing reliable results and maximum hygiene.

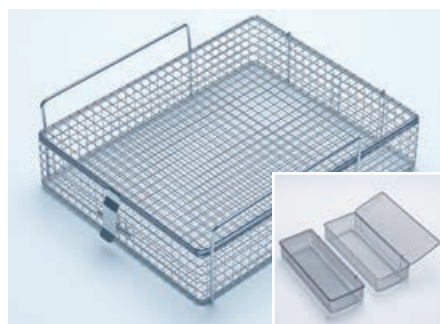

Wash chamber door with lateral splash screens for use as slop sink
Cold water rinsing using the cleaning and disinfection machine's pump system.

SUH2 universal rack

Special holders for custom applications
Designed to pre-rinse out suction bottle and lid and dispose of the contents – all in a sealed environment.

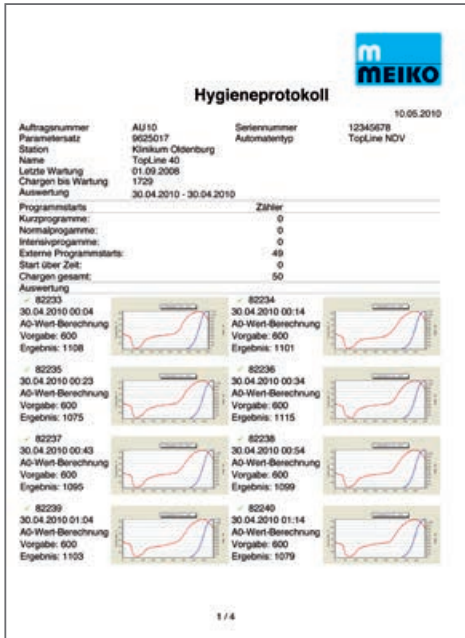

Basket for small items
With hinged lid. Designed to be inserted in the utensil holder (10 x 10 mm mesh size).

Basket insert
With hinged lid. Designed to be inserted in the basket for small items (4 x 4 mm mesh size).

MEIKO communication systems: Safeguarding hygiene standards

A seamless overview: *M-Commander InVision*

Stay up-to-date with comprehensive data on hygiene, logistical and technical aspects provided by MEIKO's *M-Commander InVision* analysis software. All the relevant information is transferred to your PC within seconds, so you can keep track of the machine's operating status clearly and easily. Compatible with MEIKO cleaning and disinfection appliances equipped with the *MIKE 2* electronic control system.

Online disinfection monitoring with a wireless temperature data logger

Ask MEIKO to install a wireless temperature data logger in your cleaning and disinfection machine – and start monitoring your machine's disinfection performance online! Certified to DIN EN ISO 15883, this fast and reliable device is designed to ensure high standards of hygiene.

- Instantly browse process data on your laptop.
- The data is sent via LAN or radio transmission and checked by a MEIKO server within a matter of seconds.
- If everything is in order, a verification certificate is created automatically.
- This certificate is immediately sent to you for your files and can be used as evidence in the event of an inspection by the authorities.
- If one or more readings do not fall within the required parameters, the service engineer can immediately take the necessary steps on-site, thereby avoiding the need for another call-out.
- You retain permanent access to the appliance information and the measurement data.
- Obtain all the relevant data for your files within the scope of regular servicing

Clean solutions: From covers to feed pipes

Splash screen for slop sink

At rear and/or side. Optional rim flushing using cleaning and disinfection appliance or separate supply. Flushing rim on slop sink operated by touch sensor (dedicated supply or through appliance control system).
